8. MATTERS RAISED IN THE SECTION 42A REPORT	10

1. INTRODUCTION

- 1.1 My full name is Erin Melissa Moogan. I am the Infrastructure Operations and Maintenance Manager for Queenstown Lakes District Council (**Council**). I have held this position since February 2014. Prior to starting with the Council I spent 8 years managing transport and public infrastructure contracts for the private sector and the Queensland Government.
- 1.2 I hold Degrees in Law (LLB) and Public Policy. I am a member of the Institute of Public Works Engineering Australasia and the International Association of Contract and Commercial Managers.
- 1.3 I have run infrastructure contracts from both the contractor and client side including maintenance contracts with a total value in excess of \$200 million and capital programs in excess of \$20 million.
- 1.4 My current role at the Council involves operational management of three waters, roading and solid waste. This involves managing staff and contractors to ensure effective day to day maintenance and operation of existing infrastructure assets and services. Key elements of this work include procurement of new maintenance contracts as they come up for expiry, day to day contract and performance management and programming and delivery of renewals programs to time and budget.

2. SCOPE OF EVIDENCE

- 2.1 My evidence relates to the new designations that the Council has included in its Proposed District Plan in respect of its infrastructure assets. My evidence outlines the proposed new designations for infrastructure purposes and explains the Council's rationale for the inclusion of these designations in the Plan.
- 2.2 My evidence also addresses the modifications proposed by the Council to its existing, rolled over designations.
- 2.3 In addition, where relevant, I address the submissions received by the Council that relate to the proposed new designations as well as the roll over, uplift of modification of existing infrastructure designations. I

discuss whether any changes or additional conditions are necessary in order to respond to submissions.

- 2.4 Finally, I address several relevant matters raised in the Council reporting officer's section 42A report relating to this hearing topic.

3. NEW INFRASTRUCTURE DESIGNATIONS

- 3.1 The new Council designations included in the Proposed District Plan for infrastructure purposes can be broadly grouped as follows:

- (a) Local Purpose Reserve: Storm Water Detention Basins, Treatment Ponds, Soakage Pits, Overflow Retention Basins, Dispersion Trenches.
- (b) Road Reserve, Local Purpose Reserve: Waste Water Pump Stations, Water Pump Stations, Water Reservoirs, Water Intakes and Water Bores.
- (c) Closed landfills (Luggate, Kingston and Glenorchy).

- 3.2 The Council generally owns the land to which the proposed designations relate, although there are some designations where some or all of the relevant land is owned by various private parties.

4. COUNCIL'S APPROACH TO NEW INFRASTRUCTURE DESIGNATIONS

- 4.1 The Council's general practice is to use the designation process to enable the construction, operation and maintenance of the necessary engineering infrastructure required to service its community. This is either by notice of requirement under Part 8 of the Act or through the inclusion of a requirement in a proposed district plan under the First Schedule to the Act. As an example, the Council has recently lodged a notice of requirement for a designation to authorise the construction, operation and maintenance of the Eastern Access Road and associated stormwater utility infrastructure near to the Queenstown Airport.

- 4.2 However, in the period up to the preparation of its current Proposed District Plan, various new infrastructure assets have been constructed

in conjunction with new subdivision and development in the Queenstown region. Construction of these facilities has been undertaken either by developers or by the Council itself by way of development contributions. Because they have been implemented in association with that subdivision and development, these assets have generally not been formally identified and protected by way of designations in the Council's District Plan.

- 4.3 In preparing the Proposed District Plan, the Council has reviewed all of these infrastructure assets and proposed to include them as new requirements. The Council's objectives in identifying, mapping and designating these facilities are to ensure their protection from adverse land uses or activities locating on or nearby the land to which they relate, and to ensure that the Council can provide for their ongoing maintenance and operation into the future.
- 4.4 The form of the proposed designations, including any necessary conditions, is provided in the Council's draft Designations Chapter. A detailed explanation of the purpose, potential effects on the environment, alternatives, objectives, necessity and consultation undertaken in respect of each designation is included in Appendix C to the Council's Designation Notification information.

5. IMPORTANCE OF INFRASTRUCTURE DESIGNATIONS

- 5.1 As indicated above, the Council's objectives in relation to the inclusion of the new infrastructure designations in the Proposed District Plan are to:
- (a) ensure the protection of the designated areas and facilities from adverse land uses or activities locating on or nearby the land; and
 - (b) ensure that the Council can provide for the ongoing operation and necessary maintenance, repair and upgrade of these facilities.
- 5.2 In the following sections, in relation to each group of infrastructure designations identified at paragraph 3.1 above, I expand on the importance of the proposed new infrastructure designations and

consider (in accordance with section 168A(3) of the Resource Management Act 1991 (RMA)):

- (a) any effects on the environment of allowing the requirements;
- (b) any relevant planning provisions;
- (c) alternative sites, routes or methods if the Council does not have an interest in the land sufficient for undertaking the work, or it is likely that the work will have a significant adverse effects on the environment;
- (d) why the work and designation are reasonably necessary to achieve the Council's objectives;
- (e) any other relevant matters; and
- (f) Part 2 of the RMA.

Stormwater related facilities

- 5.3 These proposed designations relate to facilities such as stormwater detention basins, treatment ponds, soakage pits, overflow retention basins and dispersion trenches.
- 5.4 The Council maintains seven public reticulated stormwater systems throughout its District (in Queenstown, Wanaka, Arrowtown, Hawea, Glenorchy, Albert Town and Arthur's Point). Other settlements, such as Kingston, Luggate and Makarora, have smaller stormwater management systems. There are numerous stormwater related facilities currently constructed and operating in the Queenstown district, some of which are already subject to existing designations in the District Plan. Around 25 new stormwater designations are included in the Proposed District Plan.
- 5.5 Through these facilities the Council manages the stormwater that runs off surfaces such as rooftops, paved streets, driveways and roads. This infrastructure is critical to ensure that contaminants are not carried into public waterways, which can lead to adverse effects on the environment as well as flooding and land instability. This is particularly important during high rainfall events. The Council has financial

responsibility to provide, maintain and, where necessary, upgrade this infrastructure.

- 5.6 Objective 3.2.1.5 of the Proposed District Plan is to “maintain and promote the efficient operation of the District’s infrastructure...”. The objectives and policies in Chapter 30: Energy and Utilities also seek to ensure that the establishment, use and maintenance of utilities is efficient whilst also avoiding remedying or mitigating the adverse effects of these utilities.¹
- 5.7 In light of the Proposed District Plan provisions, the Council considers it important that these designations are included in the Proposed District Plan for several key reasons. Their identification and mapping in the plan will provide the Council with certainty that no other parties are able to carry out work on the subject sites that could prevent or hinder the continued operation of this infrastructure without the Council as requiring authority’s permission. This is particularly important for the proposed designations where the underlying land is not owned by the Council, where the development of that land could adversely impact the ongoing operation of the stormwater infrastructure.
- 5.8 The inclusion of the designations also allows the Council to maintain and upgrade these stormwater facilities. The effect of a designation is to provide the Council with the ability to access and implement maintenance, repair and upgrading works without the need to obtain resource consents or permissions that would otherwise be required. Such works include regular silt removal, inspections and grass mowing, as well as more substantial repairs and upgrades, including in emergency situations. The proposed designations are the most efficient way for the Council to carry out its functions in respect of these facilities.
- 5.9 Because all of the facilities proposed to be subject to these designations are already constructed and operating, there will be no adverse or additional effects on the environment of allowing the requirements. The facilities will simply continue to operate as they are at present, with the Council able to undertake anticipated maintenance

¹ Proposed District Plan, Objectives 30.2.6 and 30.2.7.

and repair work where necessary. As a result, the Council considers the designation path to be most practical and efficient, instead of, for example, moving the facilities to alternative locations or commissioning alternative (or new) stormwater detention and treatment facilities.

- 5.10 In terms of Part 2 of the RMA, the continued operation of the critical infrastructure facilities as allowed through the requirements will enable the social and cultural wellbeing of the district's community. In particular, this will provide for the efficient use and development of natural and physical resources and the maintenance and enhancement of the quality of the environment.

Water Storage and Wastewater related facilities

- 5.11 These designations relate to the Council's functions in respect of water supply and wastewater management. A sufficient and safe supply of water to its community is critical for the Council. The treatment of wastewater (water that has been used for washing, flushing or in manufacturing processes) at internationally accepted standards is similarly a key priority.
- 5.12 The Council maintains public wastewater schemes in Queenstown, Wanaka, Arrowtown, Hawea, Albert Town, Lake Hayes and Arthur's Point. There are numerous related water supply and wastewater facilities throughout the District. Approximately 50 of these facilities are proposed to be subject to new designations in the Proposed District Plan. The Council has financial responsibility for the operation and maintenance of all of these facilities.
- 5.13 Like the stormwater facilities described above, the identification and mapping of this infrastructure through designations in the Proposed District Plan will prevent work being carried out on the subject sites that might affect the continued operation of these important facilities. This will ensure that the Council is consistent with the requirement of policy 30.2.6.5 of the Proposed District Plan to "recognise the presence and function of established network utilities, and their locational and operational requirements..." and includes situations where the underlying land is not owned by the Council.

- 5.14 It also allows the Council to carry out maintenance, repair and upgrading works. In particular, it enables the maintenance of mechanical and electrical equipment and will provide for the necessary expansion of facilities where community growth requires. Project Shotover is a good example of an existing designation assisting to facilitate a substantial sewage treatment upgrade to provide a safer treatment system for the community and to accommodate future growth.
- 5.15 Similar to the stormwater facilities, all of the water supply and wastewater infrastructure proposed to be designated is currently in operation. As such, there will be no associated effects on the environment of allowing for the requirements, with the infrastructure continuing to operate as at present allowing for routine maintenance and repair works. Relocating or constructing new facilities would therefore not be an efficient or viable option for the Council. The provision for and protection of this infrastructure through the requirements will equally enable the social and cultural wellbeing of the community and provide for the maintenance and enhancement of amenity values and the quality of the environment.

6. MODIFICATION OF EXISTING DESIGNATIONS

- 6.1 The majority of modifications to existing designations are small scale corrections for reasons such as:
- (a) providing the correct legal descriptions of designated sites;
 - (b) providing the correct purpose for the designated sites in accordance with their intended use;
 - (c) incorporating adjacent landholdings into existing designations where they have been developed for the same purpose but not formally recognised by a designation;
 - (d) correcting mapping errors; and
 - (e) deleting existing designations that are no longer required.
- 6.2 The table attached as Appendix A details the specific alterations to each of the modified designations.

7. SUBMISSIONS

- 7.1 The Council received submissions in respect of the infrastructure designations in relation to the proposed closed landfill designations and specifically in relation to Kirimoko Park in Wanaka.

Closed landfills

- 7.2 The submissions of Wakatipu Holdings Limited (submission point 314.1), Cabo Limited (submission point 481.2) and Island Capital Limited (submission points 769.1 and 769.2) oppose the inclusion of Designations 428 - Glenorchy Closed Landfill and 429 - Luggate Closed Landfill in the Proposed District Plan.
- 7.3 Since notification of the plan, the Council has decided to no longer pursue the inclusion of the proposed designations relating to the Glenorchy and Luggate closed landfills.
- 7.4 The Council was seeking these designations in order to formally identify the subject sites to landowners and the public so that they were aware of the potential associated effects, and to allow the Council to undertake any necessary remedial works without requiring any additional resource consents. This identification is a requirement of the Otago Regional Council discharge permits held by the Council.
- 7.5 However, instead of imposing the designations on the subject sites the Council considers it would be more appropriate to include a notation on the relevant District Plan maps recording the sites as closed landfills. This is consistent with the requirement of the conditions of the discharge permits held by the Council in relation to these facilities. This approach would be less burdensome on the relevant landowners who, as indicated above, have made submissions on the Proposed District Plan relating to these requirements.
- 7.6 The Council's intention is to seek to secure access to these sites for the purpose of maintenance and remedial works by way of agreements with the relevant landowners.
- 7.7 Any remedial works will likely require resource consents under the National Environmental Standard for Assessing and Managing

Contaminants in Soil to Protect Human Health and the Otago Regional Plan. A designation in the Proposed District Plan cannot circumvent these requirements.

- 7.8 The Council's reporting officer also identified in her section 42A report that the Kingston Closed Landfill designation was included in the Schedule of designations but was not shown on the planning maps. This was an error in the notified version of the Proposed District Plan. However, as with the above Glenorchy and Luggate designations, the Council is no longer pursuing the Kingston closed landfill designation. Instead, it considers that a simple notation on the planning maps will be sufficient to satisfy the requirements of its discharge permits.
- 7.9 Accordingly, the Council seeks that the Panel does not confirm the designations but instead decides that a notation on the planning maps, which accords with the location of the closed landfills in the hazard maps, is an appropriate mechanism to advise the public of the existence of the landfills and ensure compliance with the Regional Council discharge permits.

Kirimoko Park

- 7.10 Crescent Investments Limited's submission (submission point 270.1) opposes Designations 389 and 390, which are for the purpose of stormwater soakage basins, and seeks that these designations be withdrawn.
- 7.11 These designations are over private land and relate to stormwater infrastructure that is required to be maintained by the Kirimoko Park Residents Association in accordance with the conditions of consent held in respect of this land. The stormwater infrastructure is not vested in the Council and the Council has no responsibility for its maintenance, repair or upgrade. As such, the Council considers it appropriate for this submission to be accepted and the designations to be withdrawn, on the basis that they are not necessary to achieve the Council's objectives.

8. MATTERS RAISED IN THE SECTION 42A REPORT

Designation 462 – Stormwater Soak Pit/ Wastewater pump station

- 8.1 Designation 462 identifies a wastewater pump station at the end of Nichol Street, Wanaka on Lot 45 DP 311348. It was intended that there would be two designations on this site, one for the identified pump station and the other for the soak pit shown as the green square in the image below:

Figure 1: Location of designation 462 and new designation 586

- 8.2 I agree with the suggestion by Council's reporting officer at paragraph 6.37 of her report that an additional designation description should be included in Schedule 37.2 (Designation 586) and that the designation be shown on planning map 17 in the location of the green square shown on the image above.
- 8.3 The property on which these designations are located is owned by the Council and the designations are for existing infrastructure. Accordingly, I do not consider that anyone would be adversely affected by the confirmation of these two designations.

Mapping errors

8.4 Council's reporting officer has identified a number of mapping errors at paragraph 6.41 of her report. I have replicated the table from the reporting officer's report and have included an additional column with my comments.

No	Map referenced	Purpose	Description of error and proposed correction	Comments
439	39b	Kingston Closed Landfill	No such map as 39b. Additionally, this designation is not annotated on Map 39 or 39a. Recommend to the Panel that Designation #439 be shown on Map 39a (discussed further below).	As above, designation no longer pursued but Council seeks notation be included on planning map 39a.
444	39a	Waste Water Pump Station	This designation is annotated correctly on Map 39 (Arthurs Point). The reference to 39a (Kingston) is an error. Recommend that the map reference within Schedule 37.2 is corrected to Map 39.	Agree, map reference should be to map 39.
457	18, 23	Waste Water Pump Station	This designation is annotated on Map 18 (Wanaka Rural, Hawea Flat), but not on Map 23 (Wanaka) as it is outside the area that Map 23 depicts. Recommend that reference to Map 23 is removed from the Schedule 37.2.	Agree, designation only shown on map 18.
586	17	Waste Water Pump Station (Nichol Street)	As discussed in detail above, this designation was duplicated as Designation #462 and is therefore not annotated as #586 on Map 17 (Hawea). I recommend to the Panel that Designation #462 pertaining to the pump station on Map 17 is updated to reference #586.	As set out above, there are two pieces on infrastructure located on the land owned by Council where designation 462 is shown. The Council intended to designate both pieces of infrastructure. Accordingly, I recommend that a new designation notation for designation 586 be included on planning map 17. The location of designation 586 is show in Figure 1

				above.
479	18	Water Intake (Beacon Point)	Is not annotated on Map 18 but is on Map 19. Recommend that this designation is correctly referenced in Schedule 37.2 to refer to Map 19.	Agree. Designation 479 is shown on map 19.
532	25	Glenorchy Fire Station	Designation #532 is not annotated on Map 25. Recommend that reference to Designation #532 is added to Map 25.	Agree, while the designation is shown on Map 25 the designation number is not and this should be included.
564	24	Recreation Reserve, Sherwin Avenue, Albert Town	Location on Map 24 annotated twice (once correctly and once incorrectly (Fig. 5 below)). The second annotation is shown in the Rural Zone even though the site is actually located on the periphery of the township. Recommend to the Panel that the second reference located in the Rural Zone be removed.	Agree. The second reference to designation 564 in the rural zone should be deleted from map 24.

Utilities

- 8.5 Council's reporting officer has recommended that a noise control condition be imposed on those designations that have the potential to create adverse noise effects in sensitive environments, such as residential areas.
- 8.6 In my experience of managing the Council's infrastructure, the types of infrastructure referred to by the reporting officer (including sewage stations, water pump stations and water intakes) do not generate significant amounts of noise such that the levels in the proposed condition would not be met. However, for consistency with the Operative District Plan designations for these types of infrastructure, the Council agrees that the inclusion of such a condition would be appropriate, as proposed in the Council's reporting officer's Appendix 1.

QLDC DESIGNATIONS

Designation Ref #	District Plan Map #	Purpose	Site/Legal Description	SPG Comments
22	34	Water Storage	Wynyard Crescent, Queenstown Part 42 BLK 1, Mid Wakatipu SD	Legal description is incorrect it should be Section 2 SO 317363 - Fernhill No.2 Water Pump Station. Designation depicted on planning maps is incorrect and doesn't match the installed services and must be updated.
23	34	Water Supply Pump and Intake	Glenorchy – Queenstown Road, Queenstown. Part res B BLK 1 Mid Wakatipu, Sec 45 BLK 1 Mid Wakatipu Crown Land BLK XX Shotover SD. For conditions refer to C below.	Legal Description is wrong it should be Section 2 Survey Office Plan 409197. Need to update condition 2 in 'C' to 2008 acoustic standards adopted by PC27A. Designation is shown in wrong location. Add "Two Mile Water Intake" to site description.
24	34	Sewage Pump Station	Glenorchy – Queenstown Road, Sunshine Bay, Queenstown. Part Reserve B, Sec 46 BLK 1 Mid Wakatipu Block 1, Mid Wakatipu SD. For conditions refer to C below	Legal description is incorrect and should be Pt Reserve B BLK 1 Mid Wakatipu SD and Section 46 BLK 1 Mid Wakatipu SD. Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A. The Designation does not appear

				to be in correct position on District Plan Map. Need to add “Sunshine Bay Wastewater Pump Station” to site description.
25	36	Sewage Pump Station	Marine Parade, Queenstown Legal Road Section 6 Block LI Shotover SD, Queenstown. For conditions refer to C below	Need to update noise conditions in ‘C’ to 2008 acoustic standards adopted by PC27A. Add “Marine Parade Wastewater Pump Station” to site description.
26	37	Sewage Pump Station	Kelvin Peninsula, Lakeside Reserve, Queenstown. Lakeside Reserve (Crown Land) BLK 1 Coneburn Survey District. For conditions refer to C below.	Unsure of legal access rights to get to the site – easements exist through Lot 194 DP 11164 for conveyance of water and draining sewage. No ROW registered here though. Services information indicated pump station extends beyond existing designation shown on planning maps. Need to update noise conditions in ‘C’ to 2008 acoustic standards adopted by PC27A. Add “Cedar Drive Waste Water Pump Station” to site description.
27	37	Sewage Pump Station	Peninsula Road, Frankton Arm, Section 21 BLK 1 Coneburn SD, Part Frankton Recreation Reserve. For conditions refer to C below.	Need to update noise conditions in ‘C’ to 2008 acoustic standards adopted by PC27A. Add “Bayview

				Road Wastewater Pump Station” to site description.
28	35	Water Reservoir and Pump Station	Manchester Place, Queenstown. Lot 68 DP 21257. For conditions refer to C below.	Need to update conditions in ‘C’ to 2008 acoustic standards adopted by PC27A.
29	33	Multi-Purpose indoor and outdoor recreation, cultural and conference complex	SH No 6 Frankton. Lot 1 DP 25073, Lot 11 DP 22121, Sections 49, 50, 58, 61, 62 and 149 Part Sections 59, 60 and 63 For conditions refer to C below and RM 950236.	MAJOR AMENDMENT: Previous investigations into this designation has confirmed that it requires a major overhaul which deals with future development, access from SH6, implications from the Queenstown Gateway development and increased efficiencies for day to day management
30	33	Sewage Pump Station	Lake Avenue, Frankton Arm, Sections 9 and 39 Block XXXI, Frankton. For conditions refer to C below.	Designation boundaries on planning maps need to be expanded to cover existing pumping facilities built outside of current designation. Need to update noise conditions in ‘C’ to 2008 acoustic standards adopted by PC27A. Add “ Frankton Beach Wastewater Pump Station” to site description.
31	33 & 37	Water Pump Station and Intake	Loop Road, Frankton Arm Section 21, BLK I Coneburn SD. For conditions refer to C below	Designation depicted on planning maps is incorrect and doesn’t match the

				installed services and must be updated. Need to update condition 2 in 'C' to 2008 acoustic standards adopted by PC27A.
32	33 & 37	Water Reservoir and Treatment	Peninsula Road, Kelvin Peninsula. Pt Lot 1 and 2 DP 24223	Legal Description is incorrect should be Lot 1 – 3 DP 425375, and Lot 2 DP 24223.
33	33	Sewage Pump Station	Willow Place, Kelvin Peninsula Reserve. For conditions refer to C below.	Located in Willow Place Road Reserve. Designation is in wrong place for current facilities and maps need to be updated. Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A. Add "Willow Place Wastewater Pump Station" to site description.
34	33	Sewage Pump Station	Kawarau Place, Frankton. Lot 19 DP 20484. For conditions refer to C below	Designation is shown on the correct legal description but in the incorrect position. Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A. Add "Kawarau Place Wastewater Pump Station" to site description.
35	35	Leary's Gully Water Pump Station	Frankton Road, Queenstown. Lot 1 and 2 DP 311236. For conditions refer to C below.	Designation depicted on planning maps is incorrect and doesn't match the installed services and must be updated. Need to update

				conditions in 'C' to 2008 acoustic standards adopted by PC27A.
36	35	Sewage Pump Station	Peninsula Street, Queenstown, Part Sec 27 BLK XX Shotover SD	Legal Description is wrong it should be Park Street, Lot 1 and 2 DP 316049. Designation on planning maps does not align with services information. Add "Park Street Lift Wastewater Pump Station" to site description.
37	27	Sewage Treatment Works	Centennial Avenue, Arrowtown, Sections 12-15, Block XXX Arrowtown.	Legal description is wrong should be Lot 2 DP 300390.
38	27	Sewage Pump Station	Legal Road, Norfolk Street, Arrowtown. For conditions refer to C. below.	Legal description should state Section 1 SO 386245. Current mapping does not match services information.
39	27	Sewage Pump Station	Lot 38, DP 20153. McDonnell Road, Arrowtown. For conditions refer to C below.	Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A. Add "McDonnell Road Wastewater Pump Station" to site description.
40	27,28	Water Supply Reservoir	Durham Street, Arrowtown. Section 16, Block XIX, Town of Arrowtown.	Legal description is wrong. Should be Section 2 SO 378675. Also access is through Section 13, Block XIX, Town of Arrowtown and Pt Section 10, Block XIX, Town of Arrowtown. Should include these sites too.

41	27	Water Supply Pump and Intake	Bush Creek Arrowtown part Section 2 Block XXV, Crown Land, Block XXV (LIPS Ref 17551), Section 1 SO21055, section 17, Block 19, Town of Arrowtown. For conditions refer to C below.	Legal description is wrong. Should be Bush Creek Arrowtown Pt Section 2 BLK XXV TN of Arrowtown, Crown Land Block XXV (LIPS REF 17551) Section 1 SO 21055 & Section 17 BLK XIX TN of Arrowtown. Need to update condition 2 in 'C' to 2008 acoustic standards adopted by PC27A.
42	39	Water Reservoir	Arthurs Point. Lot 21 DP 22413	All ok.
43	39	Sewage Treatment Works	Arthurs Point. Part 148 BLK XIX Shotover SD.	All ok.
44	25	Water Storage Tanks	Queenstown- Glenorchy Road, Glenorchy part Section 2, Block XIX, Glenorchy Town. For conditions refer to C below.	Legal description is wrong. Should be Lot 4 DP 394250. ROW over adjoining property provides for access and conveyance of water.
45	25	Water Pump Station & Intake	Queenstown – Glenorchy Road, Crown land, Block XXI Town of Glenorchy. For conditions refer to C below.	Designation depicted on planning maps is incorrect and doesn't match the installed services and must be updated. Need to update conditions in 'C' to 2008 acoustic standards adopted by PC27A.
46	31	Sewage Treatment Works	Lower Shotover River. Lot 1 DP 15636. For conditions refer to C below and RM 970647.	Legal Description is wrong it should be Lot 4 DP 421841, Lot 2 & 3 DP 422388, Section 143 BLK 1 Shotover SD, Section 144 BLK 1 Shotover SD, Section 152 BLK 1 Shotover SD and CROWN

				Land Block 1 Shotover Survey District.
47	26	Water Supply Pump Station & Intake	Arrowtown – Lake Hayes Road, Lake Hayes. Pt Lot 17 DP 12678. For conditions refer to C below.	Legal description is wrong facilities are actually constructed in Rutherford Road Road Reserve. Designation on planning maps is in wrong position and also covers part of existing residential unit – map and designation area needs to be refined. Need to update conditions in 'C' to 2008 acoustic standards adopted by PC27A.
48	26	Water Supply Reservoir	Arrowtown – Lake Hayes Road, Lake Hayes. Lot 1 DP 23298 and Lot 2 DP 27571	Legal Description is wrong should be Lot 19 DP 329110 and Lot 1 DP 372803. Add “Lake Hayes Water Reservoir” to site description.
49	30	Recreation Reserve and Part Sewage Pump Station	Arrowtown – Lake Hayes Road, Lake Hayes. Section 87, Block IX, Shotover SD. For conditions refer to G and C below.	Legal description is wrong should be Arrowtown-Lake Hayes Road Reserve, Section 87 BLK IX Shotover SD and Section 65 BLK IX Shotover SD. Designation on planning maps needs adjusting. Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A.
50	21 & 23	Landfill and Transfer Facility	Riverbank Road, Wanaka. Section 37, part Section 38 BLK III, Lower Wanaka SD, Lot 1 DP 12876.	Legal description is wrong it should be – Lot 2- 4 DP 406972, Pt Section 38 BLK III,

				Lower Wanaka SD; Section 37 BLK III, Lower Wanaka SD; QLDC Environmental Consent Manager suggests the purpose should be amended to "Closed Landfill and Transfer Facility". Landfill is closed but still requires ongoing environmental monitoring pursuant to ORC consent 2004.189.
51	21	Sewage Treatment Works	Ballantyne Road, Wanaka Area A on Part Sec 14, Block III, Lower Wanaka SD. For conditions refer to C below.	Legal description is wrong it should be Section 1 Survey Office Plan 17808. No longer a wwtp although site not yet fully decommissioned. Delete designation as it is no longer required for proposed purpose.
52	20	Sewage Pump Station	Lakeside Road, Beacon Point. Sections 29, 1543R, Block XIV, Lower Wanaka SD. For conditions refer to C below	Legal Description is wrong it should be just Section 1543R Block XIV Lower Wanaka SD. Designation is in wrong place on planning maps and should be shifted south of 'Eely Point Access'. Should add "Eely Point Waste Water Pump Station" to site description. Need to update noise conditions in 'C' to

				2008 acoustic standards adopted by PC27A.
53	20	Sewage Pump Station	Lakeside Road, Beacon Point. Legal Road. For conditions refer to C below.	Legal description is wrong and looks like pump station is in wrong location – completely in Aubrey Road Road Reserve. District Plan map will need updating. Need to update noise conditions in 'C' to 2008 acoustic standards adopted by PC27A. Add "Lakeside Road # 1 Waste Water Pump Station" to site description.
54	22	Water Supply	Sargood Drive, Central Wanaka. Lots 1 and 2, DP 21544.	QLDC engineering have identified that the Designation area needs to increase to accommodate a secondary reservoir in future.
