ATTACHMENT D

Figure 1 from report "Prehistoric Changes in the Level of Lake Wakatipu", prepared for the Otago Regional Council by R. Thomson in February 1996.

This figure can be upgraded in part as a result of subsequent work but it is still pertinent to the lakeshore patterns at Henley Downs and gives a time frame during which "silt" from the Shotover River settled out in Lake Wakatipu along the west flank of The Remarkables.

Changes in the Level of Lake Wakatipu Since the Retreat of the Last Major Wakatipu Glacier

Drawn : R. Thomson
 Checked: J.M. Turnbull
 Date : Feb. '96
 Scale : As shown
