SUBJECT: PC44 Henley Downs SIDRA Peer Review

Hello Denis,

I have reviewed TDGs SIDRA models for Maori Jack Road and Woolshed Road. I found no reason for concern and am satisfied that the outputs generated from the models are robust and acceptable. There is no need for a report other than this memo.

Therefore at this stage we view the second access-way onto SH1 as main issue and an area for the applicant to discuss further with NZTA.

Kind Regards

Shaun Boshier
