

Attachment C - Drowning Prevention Aotearoa risk matrix and rating score

| Level | Consequence          | Examples   | Level | Likelihood     | Definitions                 |
|-------|----------------------|--|-------|----------------|-----------------------------|
| 1     | Insignificant        | Insignificant injury/illness (no medical treatment required).                | 1     | Very Rare      | Only exceptional situations |
| 2     | Minor                | Minor injury/illness (basic first aid required).                             | 2     | Unlikely       | Could occur, but unlikely   |
| 3     | Moderate             | Moderate injury/ illness (referral/transport to hospital required).          | 3     | Possible       | Could occur some time       |
| 4     | Major                | Serious injury/illness (urgent hospitalisation, extended medical treatment). | 4     | Likely         | Will probably occur         |
| 5     | Extreme/Catastrophic | Death or total permanent disability.   | 5     | Almost Certain | Is expected to occur        |

Table 2 Risk Matrix

| Consequence + Risk Likelihood |          | Action   |
|-------------------------------|----------|--|
| 2 to 4                        | Low      | No immediate action required                   |
| 5 to 6                        | Moderate | Medium risk. Further action optional.          |
| 6 to 7                        | High     | High risk. Further action recommended.         |
| 8 to 10                       | Extreme  | Extreme risk. Further action should be prompt. |
