

Town Centre Arterial Road

There's lots of work coming up as we get closer to completing the Town Centre Arterial Road project. Fitting together all the final stages is a bit like solving a big puzzle, and we want to make sure you're kept up to date as this work progresses. To help with this, we will now be sending weekly updates every Friday, outlining what's planned for the week ahead.

WEEKLY MILESTONE

It's an exciting milestone this week to see asphalt down on the new link between Henry Street and Melbourne Street.

Key dates

FRANKTON ROAD NIGHTWORKS	MARATHON WEEKEND	GORGE ROAD CLOSURE
10 Nov – 28 Nov	16 Nov – Expect a large influx of visitors. We will open as much of our work areas and roads as possible.	18 Nov – 20 Dec (includes Turner Street works)

We'll keep you updated as these dates may change due to weather, resources, or other circumstances.

Lower Suburb Street

OPENS MONDAY, 4 NOVEMBER

The flush crossing on Lower Suburb Street is complete and the road will open on Monday 4 November. The access will be left in and left out only at this stage. We will need to close this road again for a few days to lay the final layer of asphalt along Frankton Road. We'll keep you updated.

Upper Suburb Street

CLOSED

Concrete is being poured this week on the flush crossing. Paving will occur next week, followed by line-marking and finishing touches. The road is set to open on Friday, 15 November.

Dublin Street

CLOSED FROM MONDAY 11 NOVEMBER

Work to install a flush crossing begins Monday, 11 November. The road will be closed for approximately 4 weeks. Access will be via Sydney/Melbourne intersection through to Hallenstein Street. We'll update you with the opening date as soon as we have it.

Melbourne Street onto Frankton Road

CLOSED FROM MONDAY 4 NOVEMBER

This intersection will be closed from Monday, 4 November to Friday, 11 November to raise manholes ahead of the final layer of asphalt. Access to businesses along Melbourne Street remains via Hallenstein Street.

Frankton Road

Traffic will be on the lakeside of Frankton Road next week. Please follow the traffic and pedestrian signs and take extra care.

Sydney/Melbourne intersection

LAKE SIDE ENTRANCE CLOSED (TOWARDS STANLEY STREET)

The new road surface on the lower section of the intersection is progressing well. We aim to asphalt the area next week and have the intersection fully open by Monday, 11 November.

Henry Street

We are preparing the pavements, kerbs, and road in this area. Access to businesses is via Gorge Road. Please follow the traffic and pedestrian signs and take extra care due to heavy truck movements.

Gorge Road/Turner Street

Gorge Road will close after Marathon weekend from Monday, 18 November to Friday, 20 December. We will be installing median islands, raising manholes, and preparing for the final layer of asphalt. Turner Street will have a flush crossing installed. Access will be maintained for residents and businesses, with one-way exiting out of Gorge Road onto the Shotover/Stanley Street intersection.

Lower Ballarat Street

We have been installing ducting and begun work to construct a new outfall structure into Horne Creek. Stanley Street (SH6A) remains two-lanes with one-way access only into Lower Ballarat Street. Two-lane access will be available during Queenstown Marathon weekend on Saturday, 16 November.
