I ask that you accept this late response as I am out of the country and with the timeframes so tight have only just had time to respond.

This process is very rushed and timeframes are unrealistic for the community. I only received the Direction from The Commission this morning.

I feel this is an unfair process and the community should be given time to appropriately and confidently respond with enough time to review all the information provided.

Sonja Kooy.

Good morning

Council wishes to respond to the memorandum filed and responses from further submitters, and will aim to do this with the Panel later today. The panel will issue a minute in due course.

Please note that the responses received will be posted on the PDP Hearing website to view by the end of the day
